GPS (GEOGRAPHIC POPULATION STRUCTURE) ORIGINS TEST

DESCRIPTION

This test analyzes over 800,000 autosomal markers from your DNA to pinpoint your origins. It identifies when and where your DNA formed by matching the populations that came together to create a genetic line that eventually leads to you.

The GPS Origins™ test then traces the migration route of your DNA back to where it originated from and dated the age of your DNA signature. It does that for both your maternal and paternal lineages indicating where your DNA began. Your results are detailed in a report that reveals your ancestral origins..

WHY DO I NEED THIS TEST?

If you are looking to discover your genetic history beyond what is written in your family history and are looking to open more avenues of research and comprehension of your history then this test is for you. It makes a great conversation piece and an even better gift.

AM I REQUIRED TO FAST FOR THIS LAB TEST?

No, fasting is not required, but rinsing out your mouth prior to collection is recommended.
