

Any Lab Test Now

HEPATITIS PANEL

DESCRIPTION

The Hepatitis Panel from ANY LAB TEST NOW® tests for three common variations of hepatitis: Hepatitis A, Hepatitis B and Hepatitis C.

Hepatitis is an inflammation of the liver that can be contracted through unprotected sex, using contaminated needles, or other causes. There are several types of hepatitis – each caused by a different hepatitis virus.

WHY DO I NEED THIS TEST?

If left untreated, hepatitis can lead to fatigue or more serious issues like liver failure. What's most disturbing is how hepatitis can remain dormant in your body for years and cause no outward physical symptoms.

It may be impossible to detect hepatitis with just a physical examination because you may not have any noticeable symptoms. That's why it's important to be tested. Get a Hepatitis Panel and peace of mind today.

AM I REQUIRED TO FAST FOR THIS LAB TEST?

No. You are not required to fast for this test.

HOW LONG WILL IT TAKE TO GET MY LAB TEST RESULTS?

Test results generally take between 24 to 72 business hours after your specimen is collected.

OTHER RELEVANT LAB TESTS

Hepatitis can have similar symptoms (if any) as other sexually transmitted diseases. Many customers choose the Comprehensive STD Panel – which tests for several STDs (HIV, Syphilis, Herpes I and II, Gonorrhea, Chlamydia) including Hepatitis B and C.

You might also want to consider the Annual Check-Up, Liver Function Panel (Hepatic Function), or the Comprehensive Male Panel or the Comprehensive Female Panel.
