## MENTAL HEALTH PGX PANEL

### **DESCRIPTION**

The Mental Health PGx Panel is a big step to putting science into the dosing of medications for mental health issues. A total of 13 genes are analyzed and the report will indicate the response one might expect from any of the medications used to treat these conditions.

### **WHY DO I NEED THIS TEST?**

Genetic testing has potential benefits whether the results are positive or negative for a gene mutation. Test results can provide a sense of relief from uncertainty and help people make informed decisions about managing their health care. For example, a negative result can eliminate the need for unnecessary checkups and screening tests in some cases. A positive result can direct a person toward available prevention, monitoring, and treatment options. Some test results can also help people make decisions about having children.

### **HOW LONG WILL IT TAKE TO GET MY LAB TEST RESULTS?**

Test results generally takes between 5-7 business days after your sample has been received by the lab.

### **AM I REQUIRED TO FAST FOR THIS LAB TEST?**

No, fasting is not required for this test.
