SEMEN DETECTION INFIDELITY ANALYSIS

DESCRIPTION

Do you suspect your spouse or significant other cheating on you? Do you want to know if an unknown stain is semen, or if it contains sperm (DNA)? Find out now with the Semen/Sperm DNA Analysis. Although the test results are not admissible in court, the Semen/Sperm DNA Analysis answers your questions about a possible cheating spouse or significant other.

The Semen/Sperm DNA Analysis identifies the presence of semen or sperm from a stain or biological material on specific items, such as linens, undergarments, tissues, sanitary pads and other types of clothing. Ask our medical assistant what items can and cannot be tested.

Note: Pricing for this test depends on what is being tested (the type of item[s]). Please ask our medical assistant for more information.

WHY DO I NEED THIS TEST?

Don't you want to know if your spouse or significant other is cheating on you? Put your suspicions to rest, today.

OTHER RELEVANT LAB TESTS

There are dozens of other DNA tests available at ANY LAB TEST NOW® that you may want to consider including our Chain of Custody DNA Paternity Test. If you want a complete picture of your overall health, ask about our Wellness Value Panels including the Comprehensive STD Panel, Comprehensive Male or Female Profiles.
