SYPHILIS STD TEST

DESCRIPTION

The Syphilis Test detects antibodies to the bacterium that cause the disease in blood, body fluid or tissue. It will tell you if you're infected or not.

Syphilis is a sexually transmitted disease that is can be spread through kissing, oral sex and sexual intercourse.

WHY DO I NEED THIS TEST?

If you're having unprotected sex (including oral) and you have symptoms associated with this disease, you may want to get tested for syphilis. Keep in mind that if you've been exposed to syphilis, it may take up to 3 months for the antibodies to show up in your blood.

HOW LONG WILL IT TAKE TO GET MY LAB TEST RESULTS?

Test results generally take between 24 to 72 business hours after your specimen is collected.

AM I REQUIRED TO FAST FOR THIS LAB TEST?

No. You are not required to fast for this test.

OTHER RELEVANT LAB TESTS

It is common that people with STDs have more than one. Most people that get the Comprehensive STD Panel, which tests for a variety of sexually transmitted diseases.
