URINALYSIS (UA) TEST

DESCRIPTION

The Urinalysis can determine a number of health problems. It will see if your kidneys are functioning normally, if sugar is present in your urine, if you're burning fat or if you have a urinary tract infection. In addition, it can locate substances that may be causing everything from metabolic problems to kidney disorders. Some doctors request a Urinalysis before surgery or during the early stages of pregnancy.

WHY DO I NEED THIS TEST?

A Urinalysis should be considered if you're experiencing back pain, abdominal pain, blood in the urine, painful urination or frequent urination. These symptoms can be signs of more problematic health concerns such as urinary tract infections or organ failure in people with kidney disease.

HOW LONG WILL IT TAKE TO GET MY LAB TEST RESULTS?

Test results generally take between 24 to 72 business hours after your specimen is collected.

AM I REQUIRED TO FAST FOR THIS LAB TEST?

No. You do not need to fast for this test.

OTHER RELEVANT LAB TESTS

Customers who purchase the Urinalysis should also consider the Basic Check-Up, Comprehensive Male Panel or the Comprehensive Female Panel.
