Mold (Mycotoxin) Testing

DESCRIPTION

Testing for mold/mycotoxins in humans is very simple and noninvasive. A simple urine sample is required. The test will detect 15 different mycotoxins, including 9 macrocyclic trichothecenes. One of the most common and highly toxic molds is produced by a species such as *Stachybotrys* (Black Mold), which is commonly present in contaminated buildings. The results will tell if the test was positive, negative or equivocal, along with ranges of detection for each.

WHY DO I NEED THIS TEST?

If you believe you have been exposed to mold.

HOW LONG WILL IT TAKE TO GET MY LAB TEST RESULTS?

10 to 12 Business Days

AM I REQUIRED TO FAST FOR THIS LAB TEST?

No
