

THC RAPID DRUG SCREEN (MARIJUANA) (URINE)

DESCRIPTION

The **THC Rapid Drug Screen (Marijuana) (Urine)** will qualitatively identify the presence or absence of marijuana metabolite in a urine sample.

This test should only be used for drug screening purposes. A positive result is considered presumptive and should not be interpreted as definitive evidence of marijuana use without additional laboratory-based confirmation testing.

Marijuana is detectable in urine for approximately three days if use is occasional. With chronic use, it may be detectable for thirty days or more after use is stopped. Only a confirmed positive result for marijuana metabolite can be considered definitive evidence of use or exposure.

Samples requiring confirmation of presumptively positive results must be sent to an independent toxicology laboratory. The laboratory will conduct confirmatory testing by GC/MS or LC-MS/MS to identify the specific substance(s) present in the sample and their amount(s). Specimens are always transferred to the laboratory using strict chain of custody procedures that protect the identity and integrity of the specimen.

This test requires a standard urine sample that can be collected at the Any Lab Test Now store location of your choice.

This test is intended to presumptively identify recent use of the following:

- Marijuana

WHY DO I NEED THIS TEST?

For Consumers:

The **THC Rapid Drug Screen (Marijuana) (Urine)** is recommended for consumers seeking a drug test for personal knowledge or employment purposes. It is also recommended for consumers who are concerned about suspected use of marijuana by a friend or family member, including teenagers.

For Employers and Staffing Agencies:

The **THC Rapid Drug Screen (Marijuana) (Urine)** is recommended for employers who have a zero-tolerance policy when it comes to marijuana use by their employees or prospective employees¹. Action should never be taken against an employee or prospective employee based solely on rapid drug screening results. Confirmation of a presumptive positive result by an independent laboratory is strongly recommended. Consult your local Any Lab Test Now store for pricing.

WHAT DO I NEED TO DO TO PREPARE?

Drink 8-12 oz. of fluid 30 minutes prior to the test.

IS IT SAFE TO TAKE THIS TEST IF I AM PREGNANT?

Yes.

WILL CERTAIN FOODS/DRINKS MAKE THE TEST APPEAR POSITIVE?

No. Please note, however, that products containing CBD are not regulated by the Food and Drug Administration and may contain levels of THC that exceed the government's stated maximum of 0.3%. Such products have been shown to have the potential to produce a positive urine drug test result for marijuana.

DO I NEED TO MAKE AN APPOINTMENT?

No. You can walk in for same-day testing. We make it easy by offering work-friendly store hours.

¹ Note that some state regulations prohibit the use of rapid drug screens for employment purposes. Please consult your local Any Lab Test Now store for details.

HOW LONG WILL IT TAKE TO GET MY RESULTS?

Rapid drug screen results are ready to be read by a technician in as little as 5 minutes. Negative reports are available the same day the test is conducted. Allow 3-5 business days for confirmation testing to be completed, if necessary.

WHAT IF MY RAPID THC SCREEN IS PRESUMPTIVELY POSITIVE?

Additional confirmation testing of a presumptively positive result can be conducted by an independent toxicology laboratory. Note that additional charges will apply. Consult your local Any Lab Test Now store for pricing.

WHO HAS ACCESS TO MY RESULTS?

Drug test results always belong strictly to the donor, except in the case of a minor child or an employer or court-ordered drug test. The donor may also provide written authorization for test results to be provided to one or more third parties, if necessary.

IS A DOCTOR'S ORDER REQUIRED?

No. Drug testing does not require a doctor's order to be performed.

WHO CAN I CONTACT IF I HAVE QUESTIONS ABOUT MY RESULTS?

Drug testing results should be discussed with your primary care physician.

Website test descriptions and all associated information are provided through the Any Lab Test Now Product Management Team, in conjunction with the Medical Professionals Committee and Dr. Ekan Essian, MD, Corporate Medical Director.
