

NON-DOT BREATH ALCOHOL TEST (BAT)

DESCRIPTION

The **Non-DOT Breath Alcohol Test (BAT)** determines a person's blood alcohol concentration by measuring the amount of alcohol present in their exhaled breath.

Any Lab Test Now locations employ trained breath alcohol technicians using evidential breath testing devices (EBTs) to perform this test.

This test is recommended for employers interested in deterring alcohol use by employees during the workday, especially when employees work in safety-sensitive positions. Positive screen results require a second, confirmatory test. Additional charges for confirmatory tests apply.

This test is intended to identify recent use of the following:

- Alcohol

WHY DO I NEED THIS TEST?

For Employers and Staffing Agencies:

The **Non-DOT Breath Alcohol Test (BAT)** is recommended for employers who wish to deter alcohol use during the workday, especially when employees perform safety-sensitive functions.

WHAT DO I NEED TO DO TO PREPARE?

No special preparation is required. The employee should arrive promptly for their scheduled test as breath alcohol testing is time sensitive.

IS IT SAFE TO TAKE THIS TEST IF I AM PREGNANT?

Yes.

WILL CERTAIN FOODS/DRINKS MAKE THE TEST APPEAR POSITIVE?

Recent use of mouthwashes or over-the-counter medications that contain alcohol may produce a positive screening test result. Recent consumption of certain foods or drinks like kombucha or energy drinks may also give a positive screening test result. There is a mandatory waiting period of 15-30 minutes between the screening test and the confirmation test. This waiting period allows for any alcohol in the employee's mouth to dissipate before the confirmation test is administered.

HOW LONG WILL IT TAKE TO GET THE RESULTS?

Breath alcohol test results are available the same day that testing is conducted.

Website test descriptions and all associated information are provided through the Any Lab Test Now Product Management Team, in conjunction with the Medical Professionals Committee and Dr. Ekan Essian, MD, Corporate Medical Director.
