

LipoPlus (Vitamin B6 with Lipotropics) Injection

TEST DESCRIPTION:

The LipoPlus (Vitamin B6 with Lipotropics) Injection includes Vitamin B6, Vitamin B12, and lipotropics (methionine, inositol, and choline).

Vitamin B6 (also known as pyridoxine) is an important B-vitamin. It can be found in foods such as tuna, poultry, salmon, chickpeas, some fortified cereals, and more. Low vitamin B6 levels may lead to a variety of symptoms, including (but not limited to): depression, fatigue, confusion, and decreased immune function.

Vitamin B12 (also known as cyanocobalamin or methylcobalamin) is another important nutrient. Vitamin B12 can be found naturally in foods. It can also be added to foods and supplements. Foods that are naturally high in B12 include fish, red meat, poultry, eggs, dairy products, and more.

Lipotropics (such as methionine, inositol, and choline) assist with metabolism in the body. These can include different vitamins, minerals, and amino acids.

ANY LAB TEST NOW® provides LipoPlus (Vitamin B6 with Lipotropics) supplementation at wellness levels through a quick and easy injection. Benefits may include:

- May help boost your mood
- May boost your energy by breaking down carbohydrates, sugars, and fats; and converting foods to energy
- Help boost your metabolism, which can enhance weight loss efforts when combined with diet and exercise
- May help promote the breakdown of fats in the liver. Choline, a natural ingredient in lipotropics, acts as a detoxifier.
- May contribute to anemia prevention or management

We always recommend consulting with your trusted healthcare provider before receiving an injection.

TEST DETAILS:
